Introduction

Bangalore, officially known as Bengaluru, is the capital city of the Indian state of Karnataka. It has a population of over ten million, making it a megacity & is third most populous city in India. Bangalore is sometimes referred to as the "Silicon Valley of India" (or "IT capital of India") because of its role as the nation's leading information technology (IT) exporter.

Bangalore has been high on the list of young talented IT professional from across India as it offers a decent standard of living and good job opportunities. Young millennials & recent graduates often come to Bangalore to find employment.

Due to this reason, the 'Nightlife' culture of this otherwise traditional southern Indian city, is booming. After a day of hard work, Banglorians may prefer grabbing a drink at a Pub/Bar nearby. We try to explore the nearby locations of top 10 Bangalore IT Hubs and see where they may head to for relaxing & having a good time. Cheers !

We leverage the 'FourSquare Location Data' to explore these locations and try to find the most happening IT Park with max options within walking distance (3km) of the IT Park.
